Welcome Back to Term 4!

Welcome back to all our families for the final term in our Prep/One classroom. It promises to be a busy term with 9 weeks of lessons, lots to be learnt and swimming lessons to attend. Much of our learning throughout this term will focus on toys. In science, we will investigate how toys move, how their size and shape affects their movement and how musical toys can be used to create and change sounds. Students will look at how toys have changed (and some have stayed the same) over the generations to gain some historical understandings. For technology students will be designing a new toy while considering aspects such as materials, colour and function.

Our old friends, Omelet and Ginger, will return from their holiday at Mrs Katt’s home. Throughout term 4 our gardening project on the Taylor Street side of our classroom will continue with planting and watering as we work to make our very own “Curious Garden”.

Students will come to their own personal understandings of Jesus in religion by investigating what kind of a man he was. Understanding Jesus as a person will lead to great celebration of his birth as we near Christmas. Some parent assistance with craft activities in the last two weeks of term would be appreciated; details will follow.

If you are available to assist with supervision of the Prep/one students walking to and from the pool on Monday and/or Wednesdays please let me or the office know.
